Projects

DC SPACE: AI-driven Event Intelligence Platform for Predictive Crowd Management and Adaptive Event Optimization

Capstone Project

An AI-driven platform designed to analyze event-related data, predict crowd conditions, and provide data-driven insights that help organizers improve crowd management, event planning, and operational efficiency. It supports adaptive event optimization by helping organizers make informed decisions based on anticipated crowd needs.

SDCANTEEN – Ordering Management System

A canteen ordering solution for SDCA Digital Campus that allows students to browse daily menus, check item prices and availability, and place orders for pickup. It helps canteen staff manage menu updates, stock availability, incoming orders, and sales information, while queue numbers and order-status notifications help keep the pickup process organized.

Certifications

Microsoft Word Certification • Microsoft PowerPoint Certification • SQL Certification

HTML and CSS Certification • Cybersecurity Certification
